

Name: _____

Science News Article - EXTRA CREDIT
Maximum of 5 points possible per article

You may do two articles per semester

Find a minimum 1 page NEWS article related to a current or past science topic we have studied this school year. Articles may come from a magazine, newspaper, or internet. If you find something on the internet, it needs to be a real news website, not an informational webpage. If you are not sure if I would consider it “real news”, then bring me a copy of the article first before you start to work on it.

Read the article and then follow the instructions below. Be sure to answer all of the questions and parts of the assignment in order to receive maximum credit.

Summary: Provide a $\frac{1}{2}$ **page minimum** summary of the article you read. Your summary should focus on the SCIENCE that is discussed in the article. What is the point of the article related to Science? The main point or points need to be summarized. You may need more than $\frac{1}{2}$ page for some articles.

Connections/Learning: Provide a $\frac{1}{2}$ **page minimum** reflection of the article you read. How does the article (or part of the article) relate to what we have learned in class or something you know about already? What did you learn that was new to you?

Attach the article to your written work. Type the summary in Word or Google docs and print.
